Strategic Objective Committee Purpose

Organizational Alignment On Outcomes

Align the entire organization on the most important outcomes; supplying the members with temple ordinance-ready names and helping them discover their ancestors.

Unify Operational, Homeland and Technology Leaders in Strategy Prioritization

Committees unify the business, area and technology leadership in strategic prioritization, linking high-level planning with effective, cross-functional execution.

Promoting Transparency and Agility

Orient each person towards the desired outcomes; aligning their unique, complimentary role in the outcome contribution, and streamline decision-making through transparency, accountability, and agile practices.

This model is organized to foster clarity in roles and responsibilities, accountability for outcomes and delivery, and agility in adapting to discovery insights and shifting product and outcome priorities.
